

Which COLOR Moves You & Your Patients?

new

MOTION 3D COLORS Class II Appliances

Patients can now personalize their orthodontic treatment with Carriere® MOTION 3D COLORS™ Class II Appliances! All of the benefits of the MOTION Appliance you have come to rely on in your practice, now available in fun, bold colors.

The MOTION 3D COLORS Appliances turn Class II cases into simple Class I patients by treating the sagittal dimension at the beginning of treatment in order to simplify the case and reduce patient time in braces or aligners. This new treatment paradigm eliminates competing force vectors and patient compliance issues inherent in traditional Class II correction.

Whether it's the simplicity-of-use, the sleek patient-friendly design, or the remarkable speed and predictability of how it works, the MOTION 3D COLORS Class II Appliances will move you and your patients to the next level.
